Information Enterprise Management Long Term

- Information Enterprise Management using Multi-Protocol Label Switching (MPLS)
    - Supported in routers and switches
    - Benefits
        1) Traffic Engineering
        2) QoS
        3) VPNs
    - Goal: QoS enabled Theater, DISN-LES, and CWAN
- IDM Network Agent
- MDDS
- Information Enterprise Monitoring
    - Visualize network demand and performance on a total mission basis rather than on a link or node basis
